Lithium-ion batteries can be part of the solution for a clean energy future. Although growing rapidly, the battery manufacturing market is highly competitive. Producers are facing several difficulties in their quest of delivering the optimal battery solution. Our highly accurate and smart measurement devices help optimize battery production.

The market for battery energy storage is estimated to grow to \$10.84bn in 2026. The fall in battery technology prices and the increasing need for grid stability are just two reasons GlobalData have predicted for this growth, with the integration of renewable power holding significant sway over the power market.
