Enigma Lake is the largest and deepest perennially frozen lake occurring in the Northern Foothills, Northern Victoria Land in Antarctica.18,19,21 This peculiar lake, whose name is due to the presence of an unusual debris-laden area in its middle, hosts a large variety of microorganisms, like Pseudomonas species, able to withstand harsh conditions.

The microbial ecosystem in Lake Enigma even seems to be unlike other Antarctic lakes, such as those living in the well-studied McMurdo Dry Valleys, likely due to its unique chemical and thermal ...

"Lake Enigma supports a phylogenetically diverse and high-biomass microbial ecosystem that stands unique among Antarctic perennially ice-covered lakes," write the researchers in the paper.

Robert Swan spent more than five years planning the South Pole Energy Challenge Expedition (SPEC). He, along with a small team, would ski 600 miles to the Geographic South Pole - using only renewable energy, their thesis ...
