

Avelar energy Lesotho

Who owns Avelar solar technology?

Aug 27 (Interfax) - LLC Hevel, a joint venture between state nanotech company Rusnano and billionaire Viktor Vekselberg's Renova Group, has acquired 100% of LLC Avelar Solar Technology from a Renova Group company. An entry to this effect was made in the Unified State Register of Legal Entities on August 11, the SPARK-Interfax database shows.

Who owns Hevel solar?

Hevel is a joint venture in which Renova owns 51% and Rusnano holds 49%. The company is building a plant in Novocheboksarsk to manufacture photovoltaic modules. Avelar Solar Technology designs and builds solar power plants. Hevel shareholders approved the deal to buy 100% of Avelar Solar Technology at a general meeting in July.

Why did OnePower move to Lesotho?

The move coincided with OnePower's successful bid to develop the first utility-scale solar project in Lesotho, a 20-megawatt project that will sell electricity to Lesotho's central grid in addition to OnePower's minigrid work. OnePower expects that project, named Neo 1, to start delivering power to Lesotho's central electric grid next year.

What does the Department of energy do in Lesotho?

The Department of Energy is committed to increasing energy access and ensuring security of energy supply in the country. The Department of Energy is tasked with promotion and implementation of renewable energy projects and programs. A website of the Department of Energy (DoE) in Lesotho with an Energy Management Information System (EMIS).

Does Lesotho have electricity?

Known as the kingdom in the sky, Lesotho is a small, developing country crossed by mountain ranges and rivers, making it difficult to get electricity to rural regions. Recent estimates suggest that less than half of all households have electricity.

Will Lesotho become a net power exporter?

Dependent on South Africa for most of its electricity supply, Lesotho is making progress on renewable generation projects that officials say will allow the mountain kingdom to become self-sufficient and even eventually a net power exporter, writes Tonderayi Mukeredzi.
