

Average domestic energy storage price per 1GW in Bulgaria

How much does a battery cost in Bulgaria?

Currently, Bulgaria's electricity market offers an opportunity for EUR110 (\$122) per MWh profit on battery energy storage with two hours of discharge capacity using energy arbitrage. Rystad Energy 's analysis estimates battery system costs at a flat EUR60 (\$67) per MWh.

How much battery energy Storage capacity does Bulgaria have?

Bulgaria has installed between 40 MWh and 50 MWh of battery energy storage capacity to date. However, new national legislation as well as funds provided through the European Union's Recovery and Resilience Facility (RRF) could add another 1 GWh of storage capacity over the next two years.

How much does electricity cost in Bulgaria?

In the beginning of 2022, the average price of electricity in Bulgaria amounts to EUR 131.95 per megawatt, whereas in July last year it was to the tune of EUR 95 per megawatt. However, between July 2021 and January 2022, the price of electricity has fluctuated and at times, it exceeded EUR 300 per megawatt.

Why are electricity prices so high in Bulgaria?

Rising costs for fossil fuels and CO₂ emissions are already pushing electricity prices in Bulgaria to record high levels. In response, businesses are turning to renewable energy to lower their electricity bills.

How much money does the Bulgarian Energy Ministry provide for energy storage?

The Bulgarian Energy Ministry opened a tender procedure for supply of energy storage on August 21, 2024. The procedure aims to provide funding for construction and implementation of a 3,000 MWh stand-alone battery storage facility. The total amount of the grant that can be provided under the procedure is EUR590 million (\$536 million).

How much energy does Bulgaria consume in a year?

These results correspond to accumulated savings of over 9.51 TWh in Scenario 4, which is approximately Bulgaria's final energy consumption in 2015. In Scenario 5, there are savings of over 13.95 TWh, which is more than Denmark's final energy consumption in 2015.

With an annual average of sunshine ranging between 2,000 and 2,600 hours across various Bulgarian regions, photovoltaic energy contributed 41% to the energy supply ...

Bulgaria has installed between 40 MWh and 50 MWh battery energy storage capacity to date. However, a new

Average domestic energy storage price per 1GW in Bulgaria

national legislation as well as funds provided through the ...

The Bulgarian solar energy sector is witnessing a remarkable transformation as the country's solar power capacity surges past expectations, with the biggest photovoltaic parks coming online at an unprecedented pace.

...

Average prices of more than 40 products and services in Bulgaria. Prices of restaurants, food, transportation, utilities and housing are included.

Bulgaria is replacing Russian gas supplies that were interrupted in April 2022. Electricity and gas prices declined in 2023 after a surge in 2021 and 2022. They are 40% to 60% lower than the EU average. Coal and lignite consumption ...

The recent sharp increase in solar photovoltaic capacity and the expected increase of wind power capacity in Bulgaria will require a fast increase in energy storage facilities to avoid grid instability. The primary goal of the ...

In 2025, you're looking at an average cost of about \$152 per kilowatt-hour (kWh) for lithium-ion battery packs, which represents a 7% increase since 2021. Energy storage systems (ESS) for ...

Bulgaria's standalone energy storage tender, which aimed to procure at least 3 GWh of cumulative usable capacity, ultimately awarded more than three times that amount.

This report covers the following energy storage technologies: lithium-ion batteries, lead-acid batteries, pumped-storage hydropower, compressed-air energy storage, redox flow batteries, ...

Bulgaria's energy sector is at a critical juncture, with two main objectives shaping its direction: decarbonization and reducing reliance on Russian energy. Over the past ...

On 21 August 2024, the Bulgarian Ministry of Energy opened a tender procedure for National infrastructure for storage of renewable energy (RESTORE)...

The framework enables the country to add more renewable energy capacity, to help fulfil the renewable energy commitments Bulgaria has as an EU Member State The bill designates two ...

Bulgaria adopted The Energy from Renewable Sources Act in 2011. The Act regulates the generation and consumption of energy from renewable sources with the aim of achieving the national targets in terms of renewable energy use in ...

of electric energy per year. Per capita this is an average of 5,310 kWh. Bulgaria could be self-sufficient with

Average domestic energy storage price per 1GW in Bulgaria

domestically produced energy. The total production of all electric energy producing facilities is 40 bn kWh, which is 116 percent of the ...

Last 30 Days : 2025-08-04 - 2025-09-02 Day Ahead Electricity Market - average prices for Bulgaria
Download Chart 2025 Year - Day Ahead Electricity Market - average prices for ...

Executive Summary In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration ...

Investments in battery storage offer the opportunity for profitable energy arbitrage and the best potential profits in Europe are in Greece and Bulgaria, according to Rystad Energy. Battery operators can store energy ...

Rystad Energy 's analysis estimates battery system costs at a flat EUR60 (\$67) per MWh. Some experts argue that so far energy storage is not a major issue in Bulgaria, thanks to Bulgaria's plentiful operational coal and ...
