How much energy does Portugal use a year?

Portugal currently has installed solar capacity of over 2 gigawatts, double what it had at the end of 2020. It consumes around 5 million cubic meters of natural gas annually. Electricity producers use 45%, industry 45% and households 10%. "We are working to minimize or even eliminate risk of negative impacts on industry," Galamba said.

Why are energy costs so high in Portugal?

However, when compared to other European countries, energy costs in Portugal can be quite high. This is largely due to high taxes, which can quickly inflate your monthly bills. Costs can also spike during particularly hot or cold periods, as many Portuguese homes lack centralized heating and cooling systems.

What factors influence electricity prices in Portugal?

Overall, electricity prices in Portugal are influenced by a complex set of factors, and are likely to continue to evolve over time as the country seeks to balance the needs of its energy consumers with its environmental and economic goals.

Why is Portugal introducing dynamic electricity pricing?

The government has reduced VAT on basic electricity use to help offset high prices, and most components are clearly broken down on your monthly bill. Portugal is embracing dynamic pricing -- giving consumers more control and potential savings. Two types are available:

How much does electricity cost per kWh?

Households using between 2,500 and 5,000 kWh, however, paid 22.99 euros per kWh. Over the observed period, households with an annual consumption of 2,500 kWh to 5,000 kWh tended to pay less for their electricity compared to those with a consumption of between 1,000 kWh and 2,500 kWh.

The average wholesale electricity price in August 2025 in Portugal is forecast to amount to \*\*\*\*\*euros per megawatt-hour, a decrease from the previous month.
