Why are energy imports booming in Belgium?

Imports from France, the Netherlands, the UK, and Germany have surged recently. This cross-border trade is integral to meeting Belgium's electricity demand and managing price volatility. Expect import dependence to continue as the renewable buildout ramps up and nuclear availability changes. 2. Renewables on the Rise

Where do electricity companies buy electricity in Europe?

Most electricity companies in Europe buy electricity on a common market place, such as Nord Pool. All power plants that produce electricity and electricity companies that supply electricity to homes and businesses meet there. Based on supply and demand, prices are set for each hour and each area, one day in advance.

How renewables are affecting Belgium's power supply?

Renewables--especially wind and solar--are rapidly increasing their share of Belgium's power supply. In 2023, wind and solar accounted for roughly one-third of the electricity mix, a significant jump from the previous decade. Offshore wind in the North Sea is a particular success story, with Belgium now among Europe's leaders in offshore capacity.
