Energie Baden-Württemberg (EnBW) has announced plans to install a 100MW battery storage system at its power plant site in Marbach, Germany. The battery facility, with a capacity of 100MWh, is designed to bolster the stability of the entire southern German electricity grid rather than supplying power directly to households.

The market for battery energy storage is estimated to grow to \$10.84bn in 2026. The fall in battery technology prices and the increasing need for grid stability are just two reasons GlobalData have predicted for this growth, with the integration of renewable power holding significant sway over the power market.
