

The battery recycling industry has grown substantially over the past decade, primarily driven by the value of materials found in NCM batteries. However, with the increasing market share of LFP batteries globally, the need for recycling technology specific to LFP is also rising. Considering LFP cells made up over 40% of the global battery market ...

In conclusion, the strategic imperatives discussed are guiding the evolution of the battery energy storage system (BESS) industry. From advancements in clean energy technologies to innovations in energy storage and management, these developments are transforming the BESS landscape. This progress promises a future where efficient, reliable, ...

Battery-industry news breaks globally literally multiple times a day, every day. There is a lot to follow and try to evaluate. So, at the cusp of a new year, we would like to step back from this sprawling story and bring to your attention some of its most important narrative threads. Following are eight battery industry trends to watch in 2025.

The International Energy Agency is pleased to launch the report Renewable Energy Opportunities for Mauritania at the regional conference MSGBC Oil, Gas & Power 2023 in Nouakchott, Mauritania.
