

Belgium plano panel solar

Why should you install solar panels in Belgium?

With enough solar panels, you will be significantly less dependent on your energy provider and are able to use completely green electricity. Solar panels can also help you with lowering your energy bills. There are two different types of solar panels in Belgium you can install: What Are Solar Thermal Panels?

Where are Belga solar panels made?

Discover solar excellence with our Belga Solar performance solar panel, designed and manufactured in Belgium. Combining advanced performance and exceptional durability, it meets the highest standards for reliable power generation. Designed and made in Belgium! Are you interested in a profitability study for your photovoltaic system?

What's new at Belga solar?

With our new name Belga Solar (formerly Evocells), we reaffirm our identity, commitment to quality, sustainability, and innovation. We look forward to guiding you in your solar energy projects. At Belga Solar, we take our environmental responsibility seriously. That's why we have adopted a proactive approach to reducing our carbon footprint.

Where can I install solar panels in Belgium?

For the installation of solar panels on the ground, on a protected building or in other regulated cases, you will have to contact your municipality. There are several companies active in Belgium that install solar panels.

Is photovoltaic a good investment in Belgium?

Today, photovoltaics is an affordable investment for all Belgian households. The price of panels has fallen sharply over time (divided by 6 in 10 years!). Today's banks are ready to finance photovoltaic projects thanks to their long-standing proven profitability.

How much subsidy can I get for solar panels in Flanders?

Currently the maximum amount of subsidies you can receive for the instalment of solar panels in Flanders is EUR750. In 2024 the maximum subsidy will decrease to EUR375. The subsidy amount is always limited to 40% of the total investment costs including VAT, as stated on the invoices. What Is The Yield Of Solar Panels In Belgium?

The return calculation is a trap. They compare solar panels to solar panels + battery. The solar panels are subsidizing the batteries. The real calculation should be the return of only the battery itself. With 4000kWh it is usually earned back after at least 10 years, and the warranty of most batteries are only 10 years.
