

Benin new energy store

What is the energy sector in Benin like?

The energy sector in Benin is primarily reliant on biomass and imported petroleum products, with two percent of net energy consumption coming from electricity. The page below gives an overview of the energy sector in Benin and explains Power Africa's involvement in the country.

Why is Benin reliant on electricity imports?

Benin is reliant on electricity imports for a significant share of its energy supply. Reform programmes, including plans for electrification, have been put in place in the country, where only 30% of the population had access to electricity in 2017.

How can Benin meet its energy needs?

Improving Benin's ability to meet its energy needs, particularly ensuring adequate access to electricity, is a critical goal of the Beninese government to support economic development and foreign investment. Benin depends on Nigeria and Ghana for the majority of its energy, and continues to suffer from insufficient supply.

What are the opportunities in power generation in Benin?

A number of opportunities exist in power generation. As Benin seeks to both increase and diversify its electric power generation capacity, opportunities in thermal, solar, wind, and other generation technologies are increasingly attractive to potential investors.

How much electricity does Benin need?

Benin's current electricity needs are estimated at 250 MW and are expected to rise to 600 MW by 2020. One of the Talon administration's long-term goals is to increase electric power generation capacity to 4,000 MW through Public-Private Partnerships and to become an exporter of surplus power to neighboring countries.

Where does Benin sell its products?

Benin sells its products mainly to France and, in smaller quantities, to the Netherlands, Korea, Japan, and India. France is Benin's leading source for imports. Benin is also a member of the Economic Community of West African States (ECOWAS).

ENGIE Energy Access Benin propose des systèmes solaires adaptés aux besoins domestiques des ménages, offrant des lampes solaires, des câbles pour recharger le téléphone, des visions solaires, des radio solaires et plus, payable à crédit ou au comptant via MTN Mobile Money. ...
