

Bhutan swiss energy companies

Should Bhutan diversify its energy sources?

In the face of climate change and the need for enhanced energy security, the business case for Bhutan to diversify its energy sources, especially by tapping into alternative renewable energy, is compelling. Bhutan is yet to realize its full potential in terms of renewable energy.

What is the main energy source in Bhutan?

On-grid hydropower is the country's main energy source. Bhutan operates four major hydroelectric facilities, several small and mini hydroelectric generators, and has a handful of further sites in development. Many of the small and mini hydropower plants in Bhutan serve remote villages that remain disconnected from the power grid.

Who regulates the energy sector in Bhutan?

While the Department of Energy formulates policy, planning, and coordination, the Bhutan Electricity Authority is the main regulatory agency of the energy sector. Since 2006, the Electricity Authority has had the ability to impose differential tariff structures on low, medium, and high voltage consumers.

How many solar power systems are there in Bhutan?

As of 2015 there are approximately 4,600 solar power systems operating in Bhutan, with 2,750 on-grid systems and 1,848 off-grid systems. The development potential is estimated at around 12,000 megawatts. Solar energy in Bhutan has received direct investment from domestic and international sources.

Is Bhutan Power Corporation a public company?

Through 2011, the Bhutan Power Corporation remained a publicly held corporation, comprising about 9 percent of the nation's civil service, though its long-term goals included privatization. In December, 2009, Bhutan Power Corporation had 91,770 customers across the country, out of which 47,846 were rural domestic users.

How much power does Bhutan have?

Bhutan's installed power generation capacity is approximately 1.6 gigawatts (GW). Over 99 percent of the country's installed capacity comes from hydropower plants, accounting for 1,614 megawatts (MW) of the country's total capacity of 1,623 MW in 2018. More than 99.97 percent of households have access to electricity.
