

Brunei micro energy

Does Brunei have a sustainable future?

Brunei is targeting 30% renewable energy in total power generation mix by 2035, with 200 MWp of solar energy by 2025. The launch event also saw the release of Hengyi's 2023 ESG Report, which highlights their progress in environmental sustainability, social responsibility, and governance.

What is the energy supply of Brunei Darussalam?

In 2015, the total primary energy supply (TPES) of the country for both energy sources was 3.26 million tons of oil equivalent (Mtoe) in total, with 3.07 Mtoe or 94.3% from natural gas (Table 3.1). Brunei Darussalam has 922 MW of installed capacity in power generation of public utilities, including a solar photovoltaic (PV) at 1.2 MW.

Does Brunei Darussalam have a minimum energy performance standard?

This standard would require manufacturers, suppliers, wholesalers, and retailers in Brunei Darussalam to import and sell electrical appliances that meet consumers' Minimum Energy Performance Standards.

What are the major solar installations in Brunei?

Major active solar installations in Brunei include the country's first, Tenaga Suria Brunei, launched in 2010 with a capacity of 1.2 MWp, and Brunei Shell Petroleum's 3.3 MWp solar plant, launched in 2021 to supply power to its headquarters. Both plants have plans for further expansion.

What is the economic potential of Brunei Darussalam?

Brunei Darussalam is an economy with great economic potential. Its gross domestic product (GDP) in 2015 was US\$13.9 billion at constant year 2010. With a population of 416,500, Brunei's GDP per capita was US\$33,340 at constant year 2010. About 60% of Brunei's GDP is generated by the energy sector.

What is a strategic goal 2 in Brunei Darussalam?

The White Paper sets out strategic goal 2, which is specifically for energy supply and demand, i.e. to ensure a safe, secure, reliable, and efficient supply of energy in Brunei Darussalam.
