Does Bulgaria have a good energy sector?

Bulgaria's energy sector is at a critical juncture, with two main objectives shaping its direction: decarbonization and reducing reliance on Russian energy. Over the past year, Bulgaria has made considerable progress in expanding its renewable energy capacity, particularly in solar power.

Does Bulgaria have a good energy mix?

In recent years, with the help of the European Community, Bulgaria has invested in key infrastructure projects with partners such as Greece, Romania and Serbia, which will benefit its energy mix in the long term.

What is Bulgaria's energy policy?

In the early 2000s, Bulgaria's energy policy was characterized by a delicate balancing act between European aspirations and deep-rooted ties to Russia. Due to its strategic location in Southeast Europe (SEE), Bulgaria played a crucial role in various energy transit projects, particularly pipelines aimed at transporting natural gas.

How has Bulgaria's energy policy changed under Borisov?

Under the leadership of Prime Minister Boyko Borisov, Bulgaria's energy policy began to shift toward closer alignment with the European Union. Borisov's government, which came to power in 2009, was more sceptical of Bulgaria's heavy reliance on Russian energy.

Which energy sources can be used in Bulgaria?

Renewable energy includes wind, solar, biomass and geothermal energy sources (although it is not yet known whether geothermal energy could generate any electrical power as only slightly over 100 degrees C had been found by 2023). Bulgaria has a high potential for solar irradiation, especially in the southern regions of the nation.

The Aramis Solar Energy Generation and Storage Project (Project) is located in the North Livermore Valley of unincorporated Alameda County approximately 2.4 miles north of the intersection of Interstate (I)-580 and North Livermore Avenue and centered at 37.74722° N, 121.77326° W (WGS84).
