What is Energy Systems Catapult?

Based in Birmingham, Energy Systems Catapult is part of a network of nine world-leading technology and innovation centres, established by Innovate UK. The Catapult Network fosters collaboration between industry, government, research organisations, academia, and many others to transform great ideas into valuable products and services.

What is Samoa's energy plan?

to energy development. The plan will address Samoa's energy issues, promote sustainable energy development, ensure long-term energy security, economic growth, and enhance energy efficiency to reduce the country's dependence on fossil fuels, minimize environmental impact, and create new opportunities for innovation, em

What are the energy issues faced by Samoa's energy sector?

all energy stakeholders. The Plan will report on the energy issues faced by Samoa's energy sector, which includes high energy costs, dependence on imported fossil fuels, limited access to energy services in rural areas, and institutional capacity constraints to manag

Why do you want to work at Energy Systems Catapult?

We're always looking for brilliant individuals who want to help accelerate the transformation of the energy system. Our ambition is that the work you do at Energy Systems Catapult will be the most important work of your career. Ready for a new challenge? Join us to: Solve the most complex problems on our path to decarbonisation.

What is the energy sector in Samoa?

remote areas in Samoa. The energy sector in Samoa is currently undergoing a significant transformation as the country is transitioning towards sustainable, affordable, an reliable energy supply. The SESP 2017 - 2022 comprised five (5) sub-sectors, (i) Renewable Energy, (ii) Electricity, (iii) Transport, (iv) Petroleum and (v) Institutio

Which energy sources are used in Samoa in 2022?

ctricity Sources in 2022 The Electric Power Corporation (EPC), as the sole provider of electricity in Samoa, currently utilizes electricity generated from the renewable assets including those produced by Indepeude Power Producers (IPP). The Samoa Energy Database has recorded up to 22 community-based biogas systems ins

Energy Systems Catapult is an independent research and technology organisation. Our mission is to accelerate Net Zero energy innovation. Launched in 2015 by Innovate UK, the Catapult has built a team of more than 250 ...

A new report focusing on transitional arrangements for the reform of Great Britain's electricity market has been released by Energy Systems Catapult. As the country strives to meet its Clean Power 2030 Mission commitments, current electricity market arrangements have been deemed insufficient to meet future energy demands.

The Automatic Asset Registration (AAR) provides an opportunity to digitalise the energy system. AAR was initially conceived of by the Energy Data Taskforce and the Energy Digitalisation Taskforce who called for "the coordination of Asset Registration" of Low Carbon Technologies (LCT). The 2021 Smart Systems and Flexibility Plan and Energy Digitalisation Strategy ...

The Energy Digitalisation Taskforce was established by the Department for Business Energy and Industrial Strategy (BEIS), Ofgem and Innovate UK to deliver a set of actionable recommendations that challenge the status quo and help deliver the digitalised energy system needed to reach Net Zero. The key objectives of the taskforce were to:

Energy Systems Catapult has published guidance on how to create a Local Area Energy Plan (LAEP), aimed at local government organisations who are looking to create a plan to help them meet their net zero goals and climate emergency declarations.. Development of the guidance was funded by the Prospering from the Energy Revolution challenge through UK Research & ...
