What are the new solar rebates in Norway?

Norway's clean energy agency Enova will increase the maximum PV system size eligible for rebates from 15 to 20 kW and the maximum subsidy amount from 1,250 to 2,000 NOK (\$226.7) per kW installed. In addition, new subsidies of up to 10,000 NOK will be introduced for energy management systems that are often installed alongside solar arrays.

How much does a solar system cost?

The total cost for these systems generally falls between EUR5,000 and EUR12,000, including installation and essential components. A standard 7kWh system, suitable for a three-bedroom home, usually costs around EUR8,500. This investment typically includes the battery unit (EUR4,000-6,000), inverter (EUR1,500-2,000), and installation labour (EUR1,000-1,500).

How much does a solar battery backup cost?

For larger residential properties and small commercial establishments, solar battery backup systems in the 10-20kWh range typically cost between EUR9,000 and EUR18,000. This price range includes premium battery solutions from established manufacturers, advanced inverter technology, and professional installation.

How much solar power does Norway have in 2020?

In 2020, the newly installed PV capacity was around 31.7MW and, in the previous year, new solar arrays totaled 51MW. Norway had added 23.5MW of solar in 2018; 18MW a year earlier, and 11MW in 2016. This content is protected by copyright and may not be reused.

How much does a 7kWh Solar System cost?

A standard 7kWh system, suitable for a three-bedroom home, usually costs around EUR8,500. This investment typically includes the battery unit (EUR4,000-6,000), inverter (EUR1,500-2,000), and installation labour (EUR1,000-1,500). Additional components such as monitoring systems and smart controls add approximately EUR500-1,000 to the total.
