What services does Deon energy provide?

We provide automated services to regularly update you on the effectiveness and production of your installation. Deon Energy offers innovative renewable energy solutions including photovoltaic PV systems, energy storage, hybrid systems, net-metering, and retrofit-repowering projects.

Why is China a leader in green energy?

China now leads the world in many energy spaces. China refines approximately 90% of the world's critical minerals used in green energy, exports a quarter of the world's EVs, electric vehicles, and has more solar panels for use and export than the rest of the world combined.

How can China keep its energy competitive?

To export, China must keep its currency weak while keeping energy and labor costs low to keep its products competitive. When Chinese President Xi Jinping took power in 2012, he endeavored to put energy at the center of his policies. The flagship programs that have defined his tenure showcase this desire and the limits to this strategy.

Does China need energy to move out of middle-income countries?

Still, it also created an economic paradox for China if it wants to move out of the ranks of middle-income countries. To export, China must keep its currency weak while keeping energy and labor costs low to keep its products competitive. When Chinese President Xi Jinping took power in 2012, he endeavored to put energy at the center of his policies.
