

Copower energy solutions Faroe Islands

The Faroe Islands, like all other countries in this part of the world, are undergoing a green transition in energy production and energy use. Formally, the process began with a unanimous decision in the Faroese parliament in 2009, which committed the future governors to an energy policy that by 2020 would reduce total CO2-emissions by 20% ...

The aim is to develop a community-based Virtual Power Plant (cVPP) and a viable business model to support it in 5 communities of Finland, Iceland, Ireland and Faroe Islands. The common challenges are lack of affordable, reliable, and efficient energy supply due to peripherality, low population density, cold climate, accessibility issues and ...
