

What are the main sources of energy in Djibouti?

Traditional biomass fuels, petroleum products and electricity have a significant share in the country's energy mix. AFREC 2020 energy balance shows that the total primary energy supply in 2018 was 457ktoe. Djibouti has no indigenous sources of oil, natural gas, hydropower or coal.

How many people in Djibouti have access to electricity?

In Djibouti, 42% of the population has access to electricity. The government's Vision 2035 establishes goals to promote renewable energy source use for electricity generation and to pursue fuel-switching measures from fossil to renewables.

Does Djibouti get electricity from Ethiopia?

There have been power interconnections with Ethiopia in recent years, and this has accounted for about 46 per cent of the country's guaranteed electricity production (REEEP, 2012). According to the power sharing agreement, Djibouti only receives surplus energy when Ethiopia has an excess (AfDB, 2013).

Who regulates electricity in Djibouti?

The Ministry of Energy and Natural Resources is in charge of the energy sector and is also the sector regulator (Table 5). The 'Electricit' de Djibouti (EDD) is the sole generator, transmitter and distributor of electric energy. On a regional level, the country is a member of the East African Power Pool. An Electricity Law is under preparation.

How can Djibouti achieve its energy goals?

Djibouti's substantial potential for geothermal electricity generation, along with its rising capacity to produce energy from wind and solar power plants, should help the country reach its goals in coming years. In addition to the growing need for generation capacity, the expansion of renewable energy is key for Djibouti to diversify its economy.

How is Djibouti reducing its dependence on imported power?

Djibouti is also working to reduce its dependence on imported power by investing in domestic production and diversifying its energy mix. The government has ambitious plans to become the first country in Africa to fulfil 100% of its electricity demand from clean energy sources while also extending the power grid to reach 100% of the population.

As Djibouti wakes up to the potential of geothermal and wind, and looks to the P2X potential of green hydrogen, its small and fossil-fuel dependent power sector could be on the brink of major change. An update of ...

Djibouti's electrical energy is supplied primarily by thermal plants (about 120 MW) and imported hydroelectricity from Ethiopia. However, the supplemental supply of power from Ethiopia does not always satisfy Djibouti's demand for power. According to USAID's Energy sector overview for Djibouti, Djibouti has the potential to generate more than 300MW of electrical power from renewable energy sources, and much more from other resources. Based on 2020 data, Djibouti"...

Join Our Community Efforts in Djibouti to increase energy capacity and accelerate the shift from hydrocarbons to renewables moved forwards in September 2023 with the inauguration of the Ghoubet wind farm. Boosting capacity Located near Ghoubet Lake in the Arta Region along the southern coast of the Gulf of Tadjoura, the Ghoubet wind farm will provide 60 MW of clean ...

On the path to green energy . Djibouti: Aiming to be first African country entirely reliant on green energy By Olivier Caslin. Reserved for subscribers. Posted on April 13, 2021 13:55 For Djibouti, electricity coverage is as much a question of economic and social development as it is of national sovereignty. Yasuyoshi CHIBA / AFP

Ministry of Energy and Natural Resources, P. O. Box 10010, Djibouti, REPUBLIC OF DJIBOUTI omarahmed61@hotmail , hamoudsoulei@yahoo Keywords: Country report, Djibouti, geothermal energy ABSTRACT Djibouti is a small country located in East Africa in the area where the Gulf of Aden meets with the Red Sea. It is hence a strategic

As the first significant international investment in the energy sector in Djibouti, the \$122m wind power project creates the country's first independent power producer (IPP) and sets a template for further private investment. Until now, Djibouti has been entirely reliant on power generated from imported fossil fuels. Critically for the East ...

The electricity sector in Djibouti has not seen much progress for several decades and the electrification rate is just over 50 per cent (World Bank, 2016). The equipment is old and inefficient so peak production capacity is considerably lower than installed capacity. Most demand is from the city of Djibouti and it has been growing at a high of 5 per cent a year.
