

Domestic energy storage supplier quotation in Azerbaijan 2030

How much energy will Azerbaijan have by 2020?

The 2016 Strategic Road Map for the development of utilities (electricity, heating, water and gas) in the Republic of Azerbaijan included a target to add 420 MW of renewable electricity capacity by 2020, comprising 350 MW of wind, 50 MW of solar and 20 MW of bioenergy.

Does the European Union have a long-term energy strategy for Azerbaijan?

The European Union has been supporting the Ministry of Energy of Azerbaijan in its work to build a Long-term Energy Strategy from 2021-2050. This Strategy has not yet been adopted, but remains under consideration. In May 2020, the Cabinet of Ministers approved the Action Plan on Attracting Additional Investments in the Renewable Energy Field.

How much natural gas is exported in Azerbaijan?

In recent years, almost 90% of oil and over 40% of natural gas have been exported. Azerbaijan's domestic total energy supply (TES) relies on natural gas (68% in 2020) and oil (31% in 2020). Natural gas is used to generate most of the electricity and heat in the country (over 90% in 2020).

Are heat pumps being used in Azerbaijan?

Heat pumps, too, are in the early stages of utilisation in the country. For the past decade, Azerbaijan has been working to put together strategies on renewable energy, and has passed key legislation that will allow for faster deployment of renewables. While draft strategies were put forward in the 2010s, nothing was formally adopted.

How can I export data from Azerbaijan?

Data is now available through the .Stat Data Explorer, which also allows users to export data in Excel and CSV formats. Azerbaijan's economy is driven by the oil and gas sector, which accounts for some 90% of the country's exports and between 30% and 50% of its GDP, depending on oil prices.
