

El Salvador nortmar power system

What is El Salvador's energy sector like?

El Salvador's energy sector is largely focused on renewables. El Salvador is the largest producer of geothermal energy in Central America. Except for hydroelectric generation, which is almost totally owned and operated by the public company CEL (Comisi#243;n Hidroel#233;ctrica del R#237;o Lempa), the rest of the generation capacity is in private hands.

What is El Salvador's energy supply?

El Salvador's energy supply primarily comes from fossil fuels, such as oil, gasoline, diesel, liquid petroleum gas (LPG), kerosene, and bunker fuel. Natural gas does not play a role in El Salvador's energy supply.

What role does natural gas play in El Salvador's energy supply?

Natural gas does not play a role in El Salvador's energy supply. Prioritizing renewables is of utmost priority to El Salvador from an energy security basis, as they do not have any domestic oil, gas or coal supply and are dependent on imported fossil fuels from their partners.

Is El Salvador a sustainable country?

It has been noted that El Salvador's national policies have begun to fall in line with the United Nations 2030 Agenda for Sustainable Development. El Salvador's National Energy Council (CNE) develops their energy strategy, and has focused on energy efficiency and the promotion of renewable energy sources.

Is El Salvador a case study for the energy sector?

And yet, El Salvador turns out to be a unique and interesting perspective and case study for the Energy sector. Geographically, El Salvador sits near three different tectonic plates and associated fault lines. Millions of years ago, these plates bumped together and created volcanoes throughout the country.

What are the major sources of energy in El Salvador?

For energy purposes, volcanoes provide major sources for geothermal power. El Salvador also contains 307 kilometers of Pacific Ocean coastline, four main lakes: Coatepeque, Ilopango, Suchitlan, and Guija, and approximately 350 rivers.
