How to store PCB board after PCBA test?

However, for the PCB board of the OSP process, need moisture-proof box to store, the temperature and humidity requirements are more strict, and the soldering is completed within 24 hours as much as possible, otherwise the pad is easily oxidized. 2. Storage after PCBA test is completed

What is the ambient temperature and relative humidity of PCBA?

The ambient temperature is controlled between 22-28 °C; and the relative humidity is 30-60%. According to different surface processes, PCBA storage time also has an impact, as shown below: 1. Temperature: 22±4 °C; 2. Relative humidity: 30-60%; 3. Vacuum-packed with desiccant 1. Temperature: 22±4 °C; 2. Relative humidity: 30-60%; 3.

How long does a PCBA board last?

Vacuum-packed with desiccant In general, the PCBA board coated with conformal coating can extend the storage period by 3-9 months, but some PCBA boards are not suitable for conformal coating, it needs to be determined according to the actual situation of the product.
