

# Energy storage policy in 2024

What is state of energy policy 2024?

Each year, State of Energy Policy will provide updates, building on the IEA's comprehensive annual review of policies to inform its Global Energy and Climate modelling. Future editions will continue to expand on the types of policies covered. State of Energy Policy 2024 - Analysis and key findings. A report by the International Energy Agency.

How did energy storage grow in 2022 & 2023?

The US utility-scale storage sector saw tremendous growth over 2022 and 2023. The volume of energy storage installations in the United States in 2022 totaled 11,976 megawatt hours (MWh)--a figure surpassed in the first three quarters of 2023 when installations hit 13,518 MWh by cumulative volume.

What are the different types of energy storage policy?

Approximately 16 states have adopted some form of energy storage policy, which broadly fall into the following categories: procurement targets, regulatory adaptation, demonstration programs, financial incentives, and consumer protections. Below we give an overview of each of these energy storage policy categories.

Will solar add more capacity in 2024?

This addition would be 55% more added capacity than the 40.4 GW added in 2023 (the most since 2003) and points to a continued rise in industry activity. We expect solar to account for the largest share of new capacity in 2024, at 58%, followed by battery storage, at 23%. Solar.

What will Solar do in 2024?

We expect solar to account for the largest share of new capacity in 2024, at 58%, followed by battery storage, at 23%. Solar. We expect a record addition of utility-scale solar in 2024 if the scheduled 36.4 GW are added to the grid.

What is a storage policy?

All of the states with a storage policy in place have a renewable portfolio standard or a nonbinding renewable energy goal. Regulatory changes can broaden competitive access to storage such as by updating resource planning requirements or permitting storage through rate proceedings.

**EXECUTIVE SUMMARY** The deployment of battery energy storage systems (BESS) is growing throughout the United States, driven by falling prices and the rise in variable renewable ...

The ability to deploy grid-scale battery storage and install "private wires" where companies can directly connect to generators of renewables has been enhanced under a new ...

**POLICY RECOMMENDATIONS TO UNLOCK THE VALUE OF LONG-DURATION ENERGY**
