The underwater eruption of Hunga Tonga-Hunga Ha'apai sent megatons of water vapor into the stratosphere, contributing to an increase in global warming over the next 5 years.

That's where our Eos energy storage systems--powered by our Znyth™ battery technology--come in. Deployed alongside solar energy farms, all mid-duration, intra-day battery systems allow power to be gathered when the sun is brightest and then distributed later in the day when demand is highest. And our zinc-powered technology brings added ...
