What happened to NextEra Energy in Q2 2021?

US utility giant NextEra Energy added 1.84GW of renewables and energy storage projects to its backlog in Q2 2021, but its Energy Resources division reported a fiscal loss of US\$315 million. Of the 1.84GW NextEra Energy Resources added in the second quarter, roughly 1.45GW was new solar and 105MW was new energy storage.

What did NextEra Energy Resources add in Q2?

Of the 1.84GW NextEra Energy Resources added in the second quarter, roughly 1.45GW was new solar and 105MW was new energy storage. The clean energy business of NextEra also originated 310MW of solar-plus-storage facilities under its build-own-transfer unit, not included in the above additions.

Does NextEra Energy Partners have a renewables portfolio?

Image: NextEra Energy Resources. US utility NextEra Energy Partners is planning to have a renewables and energy storage portfolio of 81GW by 2027. Released during its third quarter financial results, the figure would be more than a doubling of its present renewables and energy storage portfolio, which stood at 38GW as of the end of September.

How much is NextEra worth?

NextEra has roughly 45.5GW of net generating capacity and has a planned investment portfolio of US\$50-55 billion in US infrastructure projects. This story first appeared on PV Tech. Additional reporting for Energy-Storage.news by Andy Colthorpe.

Could Guinea's Kissidougou area be a lithium mine?

Previously best known for its diamonds, Guinea's Kissidougou area near the border with Sierra Leone has shown enough potential to convince one company to explore for lithium there. On 20 April, Global Mining Resources filed an application for a permit to assess the lithium potential of the area.

The market for battery energy storage is estimated to grow to \$10.84bn in 2026. The fall in battery technology prices and the increasing need for grid stability are just two reasons GlobalData have predicted for this growth, with the integration of renewable power holding significant sway over the power market.

Battery storage fills in the gaps resulting from intermittent resources like wind and solar generation. That means facility managers can more easily bring on and off renewable energy, reducing the need for load balancing services and rapid generation ramping. **THE BENEFITS OF BATTERY STORAGE.**

FAIRFIELD -- The Solano County supervisors on Tuesday will receive a presentation on the NextEra Battery Energy Storage System AB 205 "Opt-In" application. The application allows developers to bypass local land-use authorities and apply for a permit directly through the California Energy Commission.

When asked whether other battery chemistries were considered and why lithium-ion was ultimately chosen, the spokesperson said: "The Long-Duration Storage category in the 2022 Midterm Reliability RFO was technology agnostic." "Projects were evaluated based on a combination of quantitative and qualitative criteria. Quantitative criteria ...

Reaching the "Real Zero" goal, which NextEra has described as "the most ambitious carbon emissions reduction goal ever set by an energy producer", will require "significant investment ...

In a move to take advantage of the investment tax credit (ITC), all the company's planned battery storage projects will be paired with either new or existing solar projects. For the three months ended 30 June, NextEra posted net earnings of US\$1.29 billion, up 13.5% year-on-year.

NextEra said its energy storage development programme includes 1,322MW of large-scale battery storage ranging in size from 25MW to 230MW in various US states with signed long-term contracts and a ...

The developer of the 550-MW wind and solar Wheatridge Renewable Energy Facility II (WREF II), planned for a site in Morrow and Umatilla counties in Oregon, has asked the Oregon Energy Facility Siting Council for permission to split the project into three parts.

The Blue Summit Battery Energy Storage System was developed by NextEra Energy Resources. The project is owned by NextEra Energy Resources (100%), a subsidiary of NextEra Energy Capital Holdings. The key applications of the project are renewable energy integration, frequency regulation and grid support services.

NextEra Resources will build a 100MW solar farm for Arkansas utility Entergy Arkansas, to include 30MW of battery energy storage, as Entergy seeks to build out solar capacity in the state. Entergy Arkansas said yesterday that it has contracted NextEra Resources, one of the three main NextEra power producer companies along with Florida Light ...

The Cavalry Solar PV Plant - Battery Energy Storage System is a 60,000kW energy storage project located in White County, Indiana, US. The project was announced in 2020 and will be commissioned in 2023.

"California needs significant investment in battery storage to meet its aggressive clean energy goals. NextEra Energy Resources is answering the call with nearly 700MW of battery storage projects representing a capital investment of nearly US\$800 million. We are pleased that last week the California Public Utility Commission (CPUC) approved ...

TORONTO, Sept. 18, 2024 (GLOBE NEWSWIRE) -- Electra Battery Materials Corporation (NASDAQ: ELBM; TSX-V: ELBM) ("Electra" or the "Company") is pleased to announce a joint venture, named Aki Battery Recycling, with Indigenous-owned Three Fires Group to produce battery black mass through responsible recycling of lithium-ion battery scrap and waste material.

21 · In Equatorial Guinea, where European colonial legacies still impact present dynamics, China has emerged as the leading investor, surpassing traditional powers like ...

NextEra is one of the largest clean energy operators in the US, and owns this BESS, the Desert Sunlight Battery Energy Storage System project. Image: NextEra Energy Resources. Independent power producer (IPP) NextEra Energy Resources (NEER) is set to build a 600MW standalone BESS facility in the City of Ontario, California, half of which is ...

The Resurgence Solar I Project - Battery Energy Storage System is a 75,000kW energy storage project located in San Bernardino, California, US. The rated storage capacity of the project is 300,000kWh. The electro-chemical battery energy storage project uses lithium-ion as its storage technology. The project will be commissioned in 2022.

The Desert Sunlight Battery Energy Storage System. A project extension has been given the go-ahead by landowner BLM. Image: NextEra. UK energy storage investor Gresham House and the clean energy arm of utility NextEra have moved forward with battery storage projects in California, US.

Arizona utility Salt River Project (SRP) has welcomed the start of commercial operations at a 100MW battery storage system, which has been installed at one of the company's solar PV power plants. SRP announced on Monday (18 December) that an official opening event had been held for the 4-hour duration (400MWh) battery energy storage system ...

Wholesale Lithium-Ion Battery for PV Systems? Simply put, a lithium-ion battery (commonly referred to as a Li-ion battery or LIB) is a type of rechargeable battery that is commonly used for portable electronics and electric vehicles. The popularity of this kind of battery is also steadily growing for military and aerospace applications. In a lithium-ion battery, lithium ions move from ...

NextEra's Q3 figures reveal the company added nearly 3GW of new renewables to its backlog during the third quarter of 2024, according to John Ketchum, chairman, president and CEO at NextEra Energy.

Battery energy storage will be the key to energy transition - find out how. The market for battery energy storage is estimated to grow to \$10.84bn in 2026. The fall in battery technology prices and the increasing need for grid stability are just two reasons GlobalData have predicted for this growth, with the integration of renewable power ...
