Can Eritrea build a 30 MW solar facility in Dekemhare?

Representational image. Credit: Canva The Ministry of Energy and Mines in Eritrea has initiated a bidding process for the establishment of a 30 MW solar facility in the central region of Dekemhare within the African nation.

Where is Eritrea's first solar plant?

The government of Eritrea has received a \$49.92 million grant from the African Development Bank to fund a 30 MW photovoltaic plant in the town of Dekemhare, 40 km southeast of the capital Asmara. It will be the country's first large-scale solar plant.

Why should Eritrea invest in a solar plant?

This initiative aims to address the energy needs of Eritrea while promoting sustainability and reducing carbon emissions. The solar plant is anticipated to contribute to the nation's energy independence and support its commitment to renewable energy development.

Does Eritrea have a solar farm?

Eritrea is lagging far behind in the electrification of its territory and is now turning to renewable energy. The government has launched the country's first solar farm, a 30-MW facility 30 km from the capital, Asmara.

What are the benefits of solar energy in Eritrea?

The government of Eritrea has been making efforts to promote the use of alternative sources of energy, especially solar energy, to mitigate the problems associated with the use of fossil fuel. A major benefit of solar energy is that it does not pollute the environment and saves money in the long run even if its installation cost is quite high.

Does Eritrea have solar power?

Eritrea's weather, characterized by long sunny days throughout the year, makes it suitable for harnessing solar power. Data from the wind and solar monitoring stations installed in many parts of Eritrea show that the country has a great potential, around 6 kWh/m² of solar energy.
