

The photovoltaic solar cells will emit the sunlight and convert the gathered solar energy into power energy, which is then stored in the solar battery. At night, the lamp will switch on automatically then consumes the solar power that is stored in the battery. During the first 5 hours of the night, the light will work at average lumens brightness.

The Sigcineni Off-Grid Solution project by the Eswatini Electricity Company includes a 200kWh battery energy storage system and a 35kW mini-grid solar project.
