

Ethos energy group Marshall Islands

Who is EthosEnergy?

EthosEnergy operates in more than 100 countries, providing service quality that is supported by a track record of tailored solutions. We aim to consistently improve performance across the value chain for markets, including industrial, oil and gas, power, and aerospace.

What makes EthosEnergy unique?

EthosEnergy is a culturally diverse company with common values that bind us together, Our Ethos. The five elements that form the foundation of our company were selected and defined by our employees and are present in everything that we do. We strive to live and demonstrate Our Ethos with one another, with our customers and in our communities.

How can EthosEnergy help you?

Whether you have a question about our services or capabilities, or how we can help you solve a challenge, we'd love to hear from you. What can we help you with today? EthosEnergy makes energy affordable, available and sustainable by supporting you through the complexity of business today and future transition.

What does EthosEnergy do in the Middle East?

EthosEnergy, which specialises in services and solutions for rotating equipment in the energy and industrial sectors, has expanded its footprint in the Middle East as the region's major players ramp up oil and gas investments amid concerns about global energy shortages.

What is EthosEnergy doing in Israel?

EthosEnergy is currently increasing the scope of its activities in Israel, with the overarching goal of making energy available, reliable and sustainable for all.

What services does EthosEnergy offer?

EthosEnergy also delivers comprehensive third-party operations and maintenance (O&M) services for power plant owners. Our proven programmes, practices and procedures have a solid foundation of operating experience and include unique in-house capabilities that can optimise a plant's life cycle value.

This plant, with a customized configuration specific to the site, is operated by EP Produzione, the fifth-largest electricity producer in Italy, with an installed capacity of about 4.4 GW.
