

A new interactive platform--the European Energy Storage Inventory --has been launched to provide near real-time insights into energy storage deployment across the EU, ...

A new interactive platform--the European Energy Storage Inventory--has been launched to provide near real-time insights into energy storage deployment across

Press Release European Energy has successfully divested its largest utility-scale solar project to date. This is the second major divestment in the USA since European ...

We are proud of the development of our largest European storage project to date and look forward to integrating more battery storage technology into Europe"s energy ...

The latest edition of the European Market Monitor on Energy Storage by the European Association for Storage of Energy and LCP Delta, released on 31 March, highlights ...

Energy storage is a crucial element of Europe"s future clean, functional and secure energy system. Clean molecules will be indispensable energy carriers and will remain ...

1 · While renewable energy sources can"t be depleted in the same way as fossil fuels, they are "variable", meaning their availability fluctuates. That"s where energy storage solutions, such ...

A total of 11.9GW of energy storage across all scales and technologies was installed in Europe in 2024, bringing cumulative installations to 89GW. According to the ninth ...

BayWa r.e. and GroenLeven have completed the sale of a large scale battery storage project in the Northern region of the Netherlands to Vopak.

The EU is advancing several key projects and initiatives in the energy storage field to boost renewable energy integration, stabilize the grid, and support clean energy goals. These ...

We consider three energy storage technologies, namely battery, pumped hydro, and hydrogen storage. We find that the cost-minimal energy storage mix in a country depends ...

The massive power outage in Spain has impressively demonstrated how vulnerable the European energy system is in times of energy transition. While politicians and ...

Energy storage can stabilise fluctuations in demand and supply by allowing excess electricity to be saved in

large quantities. With the energy system relying increasingly on renewables, more ...

1 · To safeguard Europe's competitiveness and resilience, the bloc must deepen its drive toward decarbonisation. Adopting the EU's 90% CO2 reduction target will ensure European ...

BayWa r.e. sells its largest battery storage project in Europe. The facility, with 300 MW, is located in the Netherlands. Vopak will now take over further development.

The fleet of energy storage projects in Europe, including both pumped hydro and battery energy storage systems of all sizes, is expanding rapidly. This growth is set to continue ...

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing ...

European Energy Storage Inventory Real-time Energy Storage Dashboard Disclaimer: The European Energy Inventory Storage dataset is mainly based on public data and data from ...
