Alternative Solutions Finland Oy: Solar thermal systems and components, retail. Areva Solar Oy: Turn-key solutions for solar energy. Financing options for large plants. Aura Energia: Holistic energy service provider in Turku area of Finland. Aurinkoinsinöörit Oy: ST and PV-systems design, import of SMA products, turn key projects.

Who is solar Finland?

The story of Solar Finland started in 1978 when the founders begun importing solar energy components to Finland. At first while the market was quite small, products were sold only to be used in summer cottages, boats, and mobile homes.

Does Finland have solar energy?

Contrary to popular belief,Finland's solar energy potential doesn't fall short of that of Central Europe. In the summer,the long days and nearly round-the-clock sunlight compensate for the dark winters. This article's Finnish version was first published in February 2019 and has been updated in June 2023.

How much solar power does Finland produce in 2022?

The Finnish Energy Authority states that in 2022,solar power production amounted to nearly 635 megawatts-more than a 240 megawatt increase compared to the previous year. Finland still produces fairly little solar electricity compared to leading European countries. The Netherlands,in contrast,produce over seven times more per capita.

Why is Finland a good place to install solar panels?

"Finland's advantage is its low atmospheric temperature,which improves the efficiency of solar photovoltaic cells. The colder it gets,the better the solar panels work. Solar panels can also withstand snow loads if they are installed following directions.
