

# Finland solar powered technologies

What is solar energy used for in Finland?

Solar energy in Finland is used primarily for water heating and by the use of photovoltaics to generate electricity. As a northern country, summer days are long and winter days are short. Above the Arctic Circle, the sun does not rise some days in winter, and does not set some days in the summer.

Who are the best solar energy companies in Finland?

Alternative Solutions Finland Oy: Solar thermal systems and components, retail. Areva Solar Oy: Turn-key solutions for solar energy. Financing options for large plants. Aura Energia: Holistic energy service provider in Turku area of Finland. Aurinkoinsin&#246;&#246;rit Oy: ST and PV-systems design, import of SMA products, turn key projects.

How much solar power does Finland produce in 2022?

The Finnish Energy Authority states that in 2022, solar power production amounted to nearly 635 megawatts—more than a 240 megawatt increase compared to the previous year. Finland still produces fairly little solar electricity compared to leading European countries. The Netherlands, in contrast, produce over seven times more per capita.

What are the conditions for solar power in Finland?

Conditions for producing solar power in Finland are similar to those in northern Germany, where solar energy has already gained a steady foothold in the electricity market. During the summer, the north benefits from long daylights, and the short winter days are compensated by reflective snow cover.

Are solar panels a good investment in Finland?

Finland has several aces up its sleeve: solar panels produce more efficiently at cool temperatures and in clean, dustless surroundings. Meanwhile, cutting-edge solar innovation is under way at dozens of export companies and places such as Aalto University, Lappeenranta University and VTT Technical Centre.

Which Finnish companies export solar energy?

Around 50 Finnish companies have exports in the solar sector, including Valoe, Green Energy Finland, Naps, Nocart and Savosolar. With solar set to become the world's biggest source of electricity by 2050, Lovio sees a vast potential for exports.

About solar power in Finland. Many Finns are already familiar with solar power: solar panels can be found on the roofs of many homes, summer cottages and workplaces. As technology develops, industrial-scale solar power production is also becoming more common in Finland. Finland is undergoing a major energy transition.

Aurinkopuisto Solar PV Park is a 45MW solar PV power project. It is planned in Finland Proper, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is

currently at the announced stage. It will be developed in ...

In planning the solar power plant in Lapua, EPV is making use of the data collected at the EPV Alavus solar power measuring station. If implemented, the Heinineva solar power plant will be the largest in Finland by far. Key figures for the planned solar farm: Plant's total output 100 MWp; Approximately 140,000 solar panels

Murtolampi Solar PV Project is a 40MW solar PV power project. It is planned in Southern Ostrobothnia, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. It ...

Luodesuo Solar PV Project is a 47MW solar PV power project. It is planned in Tavastia Proper, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. It ...

Mikkeli Solar PV Project is a 100MW solar PV power project. It is planned in Southern Savonia, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the announced stage. It will be developed in a single phase.

Pyykkialho Solar PV Project is a 50MW solar PV power project. It is planned in Satakunta, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the announced stage. It will be developed in a single phase.

Harjavalta Solar PV Park is a 90MW solar PV power project. It is planned in Satakunta, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the announced stage. It will be developed in a single phase.

Nakkila Solar PV Project is a 90MW solar PV power project. It is planned in Satakunta, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the announced stage. It will be developed in a single phase. The project construction is ...

Hevonpaa Solar PV Park is a 60MW solar PV power project. It is planned in Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the announced stage. It will be developed in a single phase.

Alight Finland Solar PV Park is a 70MW solar PV power project. It is planned in Tavastia Proper, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the announced ...

Fingrid assesses that by 2030, the overall solar power plant capacity in Finland may climb to seven gigawatts. Since 2019, the capacity connected to the main grid has increased by roughly a hundred megawatts annually. ... and clean energy from solar or wind power. The technology can be applied to the manufacture of synthetic

fuels such as ...

Violahti Solar PV Park is an 80MW solar PV power project. It is planned in Kymenlaakso, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the announced stage.

Juuka Solar PV Project is a 50MW solar PV power project. It is planned in North Karelia, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the announced ...

Juupajoki Solar PV Project is a 92MW solar PV power project. It is planned in Pirkanmaa, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the announced stage. It will be developed in a single phase.

Torsbole Solar PV Project is a 43MW solar PV power project. It is planned in Finland Proper, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. It ...

Poytya Solar PV Project is a 70MW solar PV power project. It is planned in Finland Proper, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the announced stage. It will be developed in a single phase.

Karkola Solar PV Park is a 67MW solar PV power project. It is planned in Pajanne Tavastia, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. It ...

Hitura Solar PV Park is a 63.5MW solar PV power project. It is planned in Northern Ostrobothnia, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. It ...

The Finnish government, through organizations like Business Finland, invests in R& D for renewable energy technologies, including solar power. This supports the development of new technologies and innovations in the solar sector. ... is located on the largest solar power plants in Finland, the Helsinki Solar Power Plant, is located on the rooftop ...

Known for its limited daylight hours during the winter months, Finland has become an unlikely pioneer in solar energy innovations. It's not just Finnish businesses that are spotlighting solar power; local research is also ...

Palanutkanka Solar PV Project is a 60MW solar PV power project. It is planned in South Karelia, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is

# Finland solar powered technologies

currently at the announced ...

Takamaa Solar PV Project is a 156MW solar PV power project. It is planned in Kymenlaakso, Finland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the announced ...

The Tampere Solar PV Park solar PV project with a capacity of 1.20MW. The project was developed by National Solar Power. It is located in Pirkanmaa, Finland. Buy the profile here. 5. Kivikko Solar PV Park. The Kivikko Solar PV Park has been operating since 2016. The 0.850MW solar PV project is located in Uusimaa, Finland.

Honkisaarenneva Solar PV Project is a ground-mounted solar project which is planned over 50 hectares. The project is expected to generate 31,000MWh electricity and supply enough clean energy to power 1,500 households. The solar power project consists of 65,000 modules. Development status The project construction is expected to commence from 2024.
