SUNBEAMsystem Tough Flush (TF) solar modules are a reliable source of energy even under the harshest conditions thanks to the highly efficient SUNPOWER cells (22.5% efficiency). Because there is no junction box, the semi-flexible flush modules, which are only 3 mm thick, can be installed flush to the surface.

The array edge screen(or critter guard) is designed to keep birds, squirrels and other small animals from making their homes under your solar panels. These screens are attached to the sides of fixed solar panels secured by a flush mount and are made from vinyl-coated steel mesh screening that can be adjusted to fit many different height variations.

Use cardboard to make size and mounting hole templates so you can workout where to put the panels and their mounting holes. Think it through before you do. Don't buy the ladder racks from AA products on Amazon, they rusted in a few weeks. Install the ladder racks first then bolt up the solar panels into an assembly.

SUNBEAMsystem Tough Flush (TF) solar modules are a reliable source of energy even under the harshest conditions thanks to the highly efficient SUNPOWER cells (22.5% efficiency). Due to their impressive
