

What is French Guiana doing to improve energy access?

Reflecting France's international climate (compared to 1990) in 2030. Another important planning (Programmation pluriannuelle de l'énergie, PPE) . the security of supply. French Guiana has its own pluriannual energy programming. deployment to improve energy access.

What is the energy transition in French Guiana?

The Energy Transition for green growth. Reflecting France's international climate (compared to 1990) in 2030. Another important planning (Programmation pluriannuelle de l'énergie,PPE) . the security of supply. French Guiana has its own pluriannual energy programming.

Does French Guiana have a pluriannual energy program?

As Guadeloupe,Martinique,Reunion and Mayotte,French Guiana has its own pluriannual energy programming. With an objective of energy autonomy set on the 2030 horizon,they have to accelerate the large-scale clean energy deployment to improve energy access.

Is biomass a source of electricity in French Guiana?

Traditional biomass - the burning of charcoal,crop waste,and other organic matter - is not included. This can be an important source in lower-income settings. French Guiana: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Is French Guiana a country based on fossil fuels?

French Guiana as a French overseas territory is heavily dependent on imported fossil fuels. It is a two-tier society where there is a large gap between the coastal and the inland areas concerning energy access. Compared to the coastline,the household electrification rate in the rural areas remains lower.

How much CO2 does French Guiana produce?

In 2011,CO2 emissions in French Guiana relative to the electricity production was estimated at 360 GCO2/kWhwhich was four times higher than Metropolitan France (Figure 3). The lack of access to energy in the inland areas is a key issue at the heart of French Guiana's pluriannual energy programming.

The Global Atlas for Renewable Energy is an initiative coordinated by IRENA, aimed at closing the gap between nations having access to the necessary datasets, expertise and financial support to evaluate their national renewable energy potential, and those countries lacking such elements.

BRGM has offices in every region of mainland France and in the French Overseas Territories, in order to meet the needs of its regional partners and help them deal with specific local challenges. Presentation of the activities carried out by BRGM's Regional Division in French Guiana.
