W; Energy; French Guiana Energy; French Guiana Energy. See also: French Guiana Electricity Energy Consumption in French Guiana. French Guiana consumed 15,686,060,000 BTU (0.02 quadrillion BTU) of energy in 2017. This represents 0.00% of global energy consumption. French Guiana produced 5,712,060,000 BTU (0.01 quadrillion BTU) of energy, covering 36% of its ...

The population of French Guiana is very quickly increasing. Guiana has to face a considerable energy deficit, especially in the west where the demographic growth is booming. By providing several MW of reliable and clean energy, CEOG fits with French Guiana's energy strategy.

The CEOG system is a combination of a solar park, hydrogen long-term energy storage and a battery (short-term energy storage) to produce 24/7 baseload power. It is the first time that a renewable energy project supplies a grid through a capacity-based Power Purchase Agreement, usually used for thermal power plants.

Including fees of 6% to be paid by of the purchaser. Price excluding fees 278 302 EUR. Energy class D, Climate class B Estimated average amount of annual energy expenditure for standard use, based on the year's energy prices 2021: between 1490.00 and 2050.00 EUR.

French Guiana [a] is an overseas department and region of France located on the northern coast of South America in the Guianas and the West Indies. Bordered by Suriname to the west and Brazil to the east and south, French Guiana covers a total area of 84,000 km² (32,000 sq mi) [2] [3] [7] and a land area of 83,534 km² (32,253 sq mi). [3] As of January 2024, it is home to ...
