Rear drive unit replaced on my R1T. Right around five hundred miles and after it was "fixed"; Just picked it up yesterday after it died two weeks ago. They believe it was the High Voltage to Low Voltage Inverter that is integrated into the drive unit. They cannot just replace the inverter. Had to ship a drive unit out from the factory.

Contactors connect and disconnect the HV battery to the DC HV Bus (often called the Link), under normal operating conditions. Contactors are expected to ride through an electrically abusive event (stay closed), and allow the associated fuse to activate. The contactor is not necessarily expected to be fully functional after the event.
