

Gibraltar sagemcom energy

Sagemcom has been supporting the deployments and the development of energy distribution utilities and grid controllers for more than 25 years, by offering them end-to-end products and solutions. Sagemcom develops metering products, and, since 2006, has been investing heavily in smart grid solutions, in which Sagemcom is one of the leaders in ...

In the world of energy metering, Sagemcom offers its customers end-to-end multi-energy solutions integrating all types of smart metering for energy: electricity, gas, water and heat. Sagemcom aims to provide its customers, such as utilities or property managers, with high-end multi-energy solutions that improve the control of their networks in ...

The National Energy Efficiency Action Plan looks at the necessary measures that need to be put into place in order for Gibraltar to achieve its energy saving targets of 20% by 2020, as set by the EU. Measures are distributed across varying time scales and sectors ranging from public, ...

With its experience in telecommunications and energy management that stretches back more than 25 years, Sagemcom naturally stands out as a leading player in management solutions for energy and water that actively contribute to the more rational use of energy.

This security relies mainly on software. Sagemcom offers a broad range of smart meters with levels of security that meet the DLMS Suite 0, 1 or 2 standards. Sagemcom is also extending its security offer to cover all forms of physical fraud-type intrusions or strong magnetic field-type interference. Bridge to the system security category

Sagemcom's Siconia; SolGen solutions address the need for energy in sparsely populated remote areas. They supplement the mini-grids installed in the centre of communities and enable their coverage to be extended in a modular manner. AC systems (individual or pico-grids) and DC systems (solar kits) They meet residential and commercial needs,
