Can you use plastic containers as DIY greenhouses?

We've used salad containers, cat-treat containers, milk jugs, juice bottles, and water bottles. Here are a few tips on how to use these plastic containers as DIY Greenhouses: Plastic bottles/Milk jugs: Simply cut your plastic containers in half and you'll have two ready-to-use greenhouse lids.

Can you make a DIY plastic bottle greenhouse?

Making your own DIY Plastic Bottle Greenhouse is super easy, and you really can use any clear plastic you have around the house. We've used salad containers, cat-treat containers, milk jugs, juice bottles, and water bottles. Here are a few tips on how to use these plastic containers as DIY Greenhouses:

Can I use plastic bags as a mini-greenhouse?

Plastic Bags: If you have used plastic bags that you don't want to use for your food anymore, use them as a mini-greenhouse instead! We save our plastic bags and will often re-use them for leftovers and to leftover hold seeds, but we now also use them as mini-greenhouses and they work so well!

What are greenhouse water barrels used for?

Use greenhouse water barrels for thermal mass storage to regulate temperatures, cut heating costs, and create a stable environment for optimal plant growth.

Why do greenhouses use water?

Water is the most commonly used thermal mass in greenhouses for two reasons: it has the highest heat capacity per volume of any of readily available material, and it is cheap. The only needed component is a storage container - abundant commodities in our plastic-laden society.

Where can I find reusable plant grow bags?

From hanging flower pouches to raised beds and collapsible bags, Greenhouse Megastore can help you find reusable plant grow bags to suit your needs. Most bags we sell are BPA-free and have multiple uses - for example, Root Pouch Fabric Pots can be used for in-ground planting, pot-style planting, drip irrigation and even hydroponics.
