What is Gridscale X?

Siemens has announced the launch of Gridscale X, paving the way towards the vision of autonomous grid management, accelerating digital transformation for grid operators at speed and scale. With Gridscale X, Siemens provides modular software to support utilities to tackle their most pressing challenges related to the energy transition.

What is Gridscale X LV insights?

Gridscale X LV Insights is your dedicated SaaS for ultimate LV grid transparency. Leveraging existing data, you create a digital model of your grid to monitor its status, identify critical grid segments, simulate grid developments, and share relevant insights across departments. Interested in enhancing your usable grid capacity within weeks?

Why should you choose Gridscale X & Siemens Xcelerator?

This means that Gridscale X can meet and adapt to the evolving needs of the industry, complemented by Siemens Xcelerator's open partner ecosystem. Siemens Xcelerator is an open digital business platform to accelerate digital transformation and value creation.

About Gridscale X Gridscale X paves the way for autonomous grid management, empowering grid operators to solve their most pressing challenges related to the energy transition. The modular software is easy to deploy and fast to integrate into any existing IT and OT landscape, while increasing the efficiency and reliability of utilities' operations.

Gridscale X Meter Data Management SaaS, formerly known as EnergyIP's MDM X, is the meter data management (MDM) that gives you the best of two worlds: the business benefits of innovative technology and the peace of mind only a tried-and-true vendor-neutral application can give you.
