A home battery is connected to PG& E's electric grid and charged from the grid or the customer's rooftop solar system, if applicable. A home battery, or solar+storage installation, can extend the homes power for several hours to several days, depending on the battery system size and the customer's energy needs.

Benefits of solar & batteries. Solar and battery energy storage systems allow you to offset your home's electricity usage from the broader electric grid and reduce your energy bill. By installing a battery along with your solar system, you can reduce how much energy is consumed during peak (i.e., expensive) times and further reduce your bill.
