The generator is one of the most important parts of a vertical wind turbine. For instance, the HIUHIU wind turbine comes with a coreless generator. In addition, it is super quiet. Therefore, you can barely perceive the noise even when the wind speeds are high. For a vertical wind turbine for home use, this one seems all good.

A friend of mine wants to buy a vertical axis wind turbine (~2kw). However, after searching a lot, I only find negative comments about these kind of generators in popular sites. Most of the (negative) comments are related to the turbines generating a tiny fraction of their nominal power (e.g., 10w instead of 2000...) or producing very low voltage.
