

By reducing the gap between lithium-ion batteries (LIBs) and supercapacitors (SCs) effectively, lithium-ion capacitors (LICs) have attracted tremendous attention among ...

Yuan Guo, Guangchao Han, Yuanping Yi. The Intrinsic Role of the Fusion Mode and Electron-Deficient Core in Fused-Ring Electron Acceptors for Organic Photovoltaics.

ORCID record for Guangchao Geng. ORCID provides an identifier for individuals to use with their name as they engage in research, scholarship, and innovation activities.

Battery energy storage system (BESS) is an important component of future energy infrastructure with significant renewable energy penetration. Lead-carbon battery is an ...

The unique microstructure implies PGCNs a broad prospect for energy storage application. When applied as negative electrode materials in dual-carbon lithium-ion ...

In specific, carbon cathode with a high specific capacity plays a crucial role in achieving the high energy density of LICs devices. Herein, the ordered-disordered hybrid carbon structure was ...

This study highlights the importance of enhancing ion transport to maximize the performance of PLRO-based ASSBs, offering a practical solution for advancing energy storage ...

This study highlights the importance of enhancing ion transport to maximize the performance of PLRO-based ASSBs, offering a practical solution for advancing energy storage ...

Based on the accurate battery state estimation, each energy storage unit can be regarded as an agent during power allocation and the consensus factor of the agent should be ...

Lithium-sulfur (Li-S) battery is regarded as one of the most fascinating candidates for energy storage due to its dominant advantage of high energy density.

Energy storage system [6] provides a flexible way for energy conversion, which is a key link in the efficient utilization of distributed power generation. Battery energy storage ...
