

# Home energy storage tender price in Norway 2026

Will Norway's electricity prices increase in 2026?

An estimate of this effect is contained on page 15 of the THEMA report, suggesting that market prices in Norway will increase by up to 3.7% in 2026, and 8.8% in 2030 as a result of the scheme, leading then to an increase of businesses' and municipalities' electricity expenses.

What is the future of energy storage in Norway?

Norway's poor lighting conditions, residential PV and energy storage development are limited, the future market may mainly focus on the outlying island microgrid. Spain will install 242 MW of energy storage in 2023 and is expected to increase to 5.8 GW by 2030.

What does Norway price mean for district heating customers?

The proposed legislation on Norway Price also means that district heating customers will have the same opportunity to choose Norway Price as electricity customers. Like the electricity subsidy scheme, Norway Price is a state subsidy scheme for households and not a fixed-price agreement in the end-user market.

Will Norway price erode the role of electricity suppliers in the market?

In addition, and in line with concerns raised in the public consultation, the administration of Norway Price necessitates more direct exchanges of DSOs with customers, possibly eroding the role electricity suppliers have and ought to have in the market.

Will Norway price reduce incentives to invest in heating solutions?

"The Ministry considers that Norway Price could reduce incentives to invest in heating solutions based on alternatives to electricity, including heat pumps, wood burning, wood chips and pellets, compared with the current electricity subsidy scheme. In winter, when electricity prices are

Will Norway price affect electricity prices?

They fear that Norway Price will lead to increased electricity consumption, higher and more volatile electricity prices in the Nordic market, operational challenges for the power system and a negative impact on the price hedging market (forward and fixed price contracts).

Almost 70% of home solar PV in Germany comes with battery energy storage attached and the country's residential storage market represented around 2.3 GWh of installed capacity by the end of 2020.

Procurement of Gas Storage Obligation On behalf of the government, the Danish Energy Agency has launched a procurement process aimed at increasing gas storage levels ahead of the ...
