This battery is a high voltage battery connected in series. A minimum of 2 and maximum of 4 is allowed for the AIO and a minimum of 2 and maximum of 7 is acceptable of the Fox Charger range. The batteries include their own cables. ...

The datasheets all have similar stats and quotes them as same battery type (LiFePO4) so it's not obvious on the face of it but I would guess it's to do with battery life? The HV25 datasheet mentions 6000 cycles to 80% SOH but the same stat is not shown on the HV2600 datasheet (it also states 6000 cycles but the note just has "@90 DOD").
