

By Naoko Tochibayashi, Communications Lead, World Economic Forum and Naoko Kutty, Writer, Forum Agenda Japan is a global leader in hydrogen technology ...

Hydrogen Energy Storage Market Hydrogen Energy Storage Market Size and Share Forecast Outlook 2025 to 2035 The hydrogen energy storage market is projected to ...

The 41st Japan-Australia Resources and Energy Dialogue Held (August 18, 2025) News Release Ministerial Meeting on Sustainable Fuels and 7th Hydrogen Energy ...

Japan's Strategy rests on the firm belief that hydrogen can be a decisive response to its energy and climate challenges. It could foster deep decarbonisation of the transport, power, industry ...

To that end, pursuant to the Basic Hydrogen Strategy, etc., Japan should accelerate an expansion of demand for hydrogen in mobility centering on fuel cell-powered ...

Japanese researchers claim it is the first simple-structure interstitial aluminum alloy, and that it has potential for hydrogen storage. The major downside of ...

A total of 27 projects was awarded 34.6 billion yen in subsidies through METI's FY2024 program for supporting the expansion of renewable energy through introduction of ...

The novelties of this study are (1) the quantitative analysis of the staged hydrogen economy scenario potential in Japan; (2) presenting the performance of hydrogen and ...

During the seminar's plenary sessions, Dr. Iimura, Executive Director of NEDO delivered a keynote speech, outlining Japan's hydrogen policy trends and the advancements in ...

In May 2024, the Hydrogen Society Promotion Act was enacted to strongly support the popularization and utilization of hydrogen as a source of energy. Part 1 of this ...

Japan was an early proponent of the use of hydrogen for decarbonization, publishing its first hydrogen strategy in 2017, and the substance continues to be a critical part ...

It also pledges 15 trillion yen (\$107 billion) in funding from both private and public sources to build up hydrogen-related supply chains over the ...

The Sweep Energy Storage System One of the key exhibits at Japan Mobility Bizweek is Toyota's Sweep

Hydrogen energy storage japanese

Energy Storage System, which recycles used batteries from hybrid ...

To achieve its ambitious goals, the Japanese government is taking an approach based on public-private partnerships, welcoming companies from around the ...

Low-carbon hydrogen and ammonia are viewed as key elements for Japan's energy security and decarbonisation efforts, and an important sector for Japan's economic growth and industrial ...

Hydrogen not only contributes directly to the decarbonization of the electric power sector, but also allows the potential of zero-emission power sources such as renewable energy to be ...

Japan Hydrogen Energy Storage Market Trends The Japan Hydrogen Energy Storage Market is experiencing significant growth driven by the country's strong commitment to reducing carbon ...

Japan's Hydrogen Policies Japan was the first country to formulate a national hydrogen strategy, in 2017, which was then revised in 2023 Declared "2050 carbon neutrality" goal in 2020. ...

First is J-POWER and Sumitomo Corporation, to produce clean hydrogen from Latrobe Valley coal with carbon capture, utilisation and storage (CCUS). The second is Japan Suiso Energy ...

The Japanese government and Japanese corporations are seeking international partners to build a hydrogen supply chain, increase the scale of production of hydrogen and ammonia, and ...
