

# Isa energy Somalia

What does Isa do?

Recognizing the critical role of universal energy access, energy security, and energy transition, ISA has undertaken a strategic initiative to provide regulatory support, fostering the development of requisite frameworks to ensure the long-term viability of solar projects.

What is the International Solar Alliance?

The International Solar Alliance is an action-oriented, member-driven, intergovernmental organisation for increased deployment of solar energy technologies as a means for bringing energy access, ensuring energy security, and driving energy transition in its Member Countries. 102 Member Countries

How has Isa facilitated solar deployment?

ISA played a pivotal role in facilitating solar deployment through its nine programs across 53 Member Countries. Noteworthy achievements included the facilitation of bankable large-scale solar projects, exemplified by Cuba's adoption of 2100 MW of solar projects with ISA's support.

How does Isa impact the solar industry?

ISA's impact extended beyond project facilitation, as evidenced by its role in reducing the global price of solar pumps by 50% and providing training to 4,500 professionals across 55 countries.

How will France support the International Solar Alliance?

France will continue to support the International Solar Alliance, to enhance collaboration and speed up the development of solar energy. It will thus encourage new partner countries to join the Alliance and will synergise with the initiatives and organisations in developing renewable energies."

What did Isa do in 2023?

In 2023, the International Solar Alliance (ISA) experienced substantial growth, expanding its membership from 110 to 118 countries and solidifying its role as a driving force in global solar energy adoption. ISA played a pivotal role in facilitating solar deployment through its nine programs across 53 Member Countries.

PDF | On Jul 1, 2023, Abdullahi Mohamed Samatar and others published The utilization and potential of solar energy in Somalia: Current state and prospects | Find, read and cite all the research ...

Estimates indicate that access to energy in Somalia is at approximately 11% in rural areas and 66% in urban areas, with an average of 36% across the country. Studies show that urban areas like Mogadishu have about 60% access to some sort of energy, mostly used for household lighting (e.g., car batteries

Somalia, [a] officially the Federal Republic of Somalia, [b] is the easternmost country in continental Africa. The country is located in the Horn of Africa and is bordered by Ethiopia to the west, Djibouti [14] to
