

Isle of Man: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

We rebranded to Isle of Man Energy signifying our new direction. The change marks the beginning of our exciting journey to a Net Zero future and our role in supporting the island's energy transition. Our journey to net zero emissions. Our ambition is to be a Net Zero business. For a company that has supplied gas, a fossil fuel, for over 150 ...
