

Japan circor energy

Who is Circor energy?

CIRCOR Energy is a market-leading, global provider of integrated flow control solutions in the expanding and evolving oil and gas industries, specializing in highly engineered valves and pipeline products and services.

What does Circor do?

CIRCOR delivers pump & valve systems and custom engineering & design services designed to address the most mission-critical and severe-service applications. On land and sea, in air and space, and under the ocean's surface, when failure is not an option, the most trusted name in critical fluid handling is CIRCOR. If it is flow control, it's here.

Why should oil & gas customers choose Circor?

The escalating number of environmental regulations and significant power needs in refineries. Customers turn to CIRCOR for fluid-handling solutions that transfer critical fluids without interruption and keep equipment running at peak efficiency. Because failure is not an option in oil & gas.

Why should you choose Circor for a pump & valve system?

The stakes are high, the environments are demanding, and the consequences are catastrophic for those tasked with fluid handling in the world's toughest environments. CIRCOR delivers pump & valve systems and custom engineering & design services designed to address the most mission-critical and severe-service applications.

Why should you choose Circor?

CIRCOR has a skilled team of knowledgeable and proven in-country experts that works with customers worldwide to understand their unique situations and recommend the right solutions. © 2024 CIRCOR International. All Rights Reserved. Critical application expertise and a global network of resources for your power generation project from CIRCOR.

Why should you choose Circor terminal station solutions?

Move fluids with speed and precision by having the right people and technology in place. Backed by a team of knowledgeable specialists, CIRCOR terminal station solutions ensure efficiency flows downstream, whether you're charged with loading and unloading fluids or storing, redistributing and consolidating them.

CIRCOR markets its solutions directly and through various sales partners to more than 14,000 customers in approximately 100 countries. The Company has a global presence with approximately 3,100 employees and is headquartered in Burlington, Massachusetts.

For over 30 years, the U.S Navy has relied on products from CIRCOR's Portland Valve to address its biggest challenges. From isolation valves to advanced smart control valves, we have a variety of valves to meet your
