

Jersey solar culture

What do people in Jersey think about solar farms?

Jersey Electricity (JE) is asking people in St Mary what they think about proposals for two solar farms. The solar farms would produce enough energy to power nearly 1,200 homes in Jersey, said JE. Land earmarked for the siting of the panels would continue to be used for grazing and growing crops, it said.

Are there plans to build a solar farm in Jersey?

Concerns have been raised over plans to build six solar farms across Jersey. The first site is nearing completion at St Clement and two other sites have passed the planning stage, with building work expected to begin in early 2025.

Could a solar farm boost Jersey's energy security?

Bosses said the plans for the 2.7 hectare site, meant electricity would be returned to the grid in a process which would "increase Jersey's energy security". A solar farm in Jersey could power 17% of the parish's homes if planning is approved, electricity bosses say.

Could St Clement be Jersey's first ground-mounted solar farm?

Land south of Rue du Moulin "224; Vent, St Clement, could be the site for Jersey's first ground-mounted solar farm if plans by Jersey Electricity get the go-ahead.

Does Jersey electricity want to protect green space?

Steve Tanner, head of capital delivery for Jersey Electricity (JE), said the company wanted to "protect green space on the island" and "the total of all six sites is only 0.8% of the total agricultural land available". Ms Layzell said: "These fields in St Mary are in the top 50% of land for Jersey Royals.

Will a ground-based solar installation at Mont Fondon increase Jersey's energy security?

Jersey Electricity (JE) is inviting St Peter parishioners to attend a consultation for a ground-based solar installation at Mont Fondon. Bosses said the plans for the 2.7 hectare site, meant electricity would be returned to the grid in a process which would "increase Jersey's energy security".

I really wanted to go solar but every company I looked into was just so disreputable. From companies that basically want to become your utility for life and jack up your electricity rates over time to others with basically no customer service who ghost you after you install their panels and pay them, the reviews and business models were terrible.

There seems to be a common misconception about Solar and temperature. Solar energy comes from Light not heat. The fact that it's cold in the winter has no effect on solar. However shorter days with less direct sun does have an effect. However, the only place where this would not have a significant effect would be at the equator.

Solar power technologies harness the energy from the sun's light and converts it into electricity. Solar photovoltaic panels, (Solar PV panels), are made up of individual cells made of silicon or other special material. When the sun hits the solar panel the photons from the sunlight are absorbed by the cells, creating an electric field and causing electricity to flow.

Real solar systems can partially power your house during a blackout. Scam solar systems masquerade as a way to save money, but in reality is a gimmick to sell products and services. Unfortunately, a sufficient solar system is actually much bigger and costlier than the stuff these door to door salesmen are offering.
