significant energy consumption savings can be achieved and these savings provide substantial budgetary savings for Kosovo budget as well as have a positive impact on reducing pollution and GHG. In line with the EU 2020 strategy, Kosovo's National Energy Strategy¹⁰ one of ...

Nearly 40 per cent of the energy is used by the residential sector. If compared to the EU average, the demand of energy per square metre in Kosovo is twice as high. Energy efficiency (EE) is commonly considered the "first fuel" of economic development, with its energy savings completely eclipsing most forms of generation costs.

Kosovo* has not notified to the Secretariat an adopted Nation - al Energy and Climate Plan (NECP) and thus missed the legal deadline. Kosovo* has not defined the 2030 climate target in its national legislation, but it is included in the draft NECP. The target is in line with the 2030 targets set by the Energy Community.
