

Large scale battery storage project financing options in Spain 2026

What is Spain's energy storage subsidy plan?

EU approved Spain's EUR700 million energy storage subsidy plan, enabling Spain to deploy large-scale battery storage with co-financing up to 85%.

Why are battery storage options more suitable in Spain?

As a result, shorter duration storage options like batteries are more suitable in Spain. In Spain, over 50% of excess renewable energy occurs in periods where there is continuous excess for less than 12 hours i.e. a battery that chooses to charge on this energy would be able to discharge within 12 hours.

Can energy storage projects get 85% co-financing?

Standalone and renewables-plus-storage battery projects can apply for up to 85% co-financing, along with pumped hydro and thermal energy storage sites. Friday saw the publication of a call for applications for energy storage projects hoping to receive support from a EUR700 million (\$794 million) EU-funded program in Spain.

Will Spain get 20GW of new energy storage by 2030?

Spain is targeting 20GW of new energy storage by 2030. MITECO also launched a similarly-sized grant scheme specifically for co-located or hybridised energy storage projects, for which proposals were due in March 2023. Enel Green Power submitted two projects during the first quarter which fit the criteria, totalling 60MWh and 38MWh respectively.

Is commercial and industrial energy storage underserved in Spain?

While Spain focuses on large-scale energy storage projects, commercial and industrial (C&I) energy storage remains underserved- a EUR2.1 billion untapped market (Wood Mackenzie 2024). Our modular commercial battery storage systems offer: ? EU-Compliant Safety Certifications (UN38.3, CE-EMC, IEC62619) ensuring subsidy eligibility.

How will Spain's energy transition work?

Spain's energy transition just gained massive momentum. On March 17th, 2025, the European Commission approved a EUR700 million (\$763 million) solar subsidy program to accelerate large-scale battery storage deployment nationwide.

The majority of newly installed large-scale electricity storage systems in recent years utilise lithium-ion chemistries for increased grid resiliency and sustainability. The capacity of lithium ...

On Dec.10th, 2024, announced by Stellantis group, Contemporary Amperex Technology Co. Limited (CATL) and Stellantis have unveiled a landmark agreement to establish a joint venture, ...

Large scale battery storage project financing options in Spain 2026

A render of the BESS project in Germany. Image: Kyon Energy. Developer Kyon Energy has claimed the largest approved BESS in Europe for a 275MWh project in Germany, just as regulators extend grid fee ...

Quiver AI Summary N2OFF, Inc., a cleantech company specializing in solar energy, has announced additional debt financing of EUR600,000 to Solterra Renewable Energy Ltd. to ...

European Market Outlook for Battery Storage 2025-2029 7 May 2025 The report explores trends and forecasts across residential, commercial & industrial (C& I), and utility ...

Zenobe has secured its largest battery storage financing to date, with Scottish battery storage assets to exceed 1GW £220 million in long-term debt will fund a new battery storage site in Eccles, Scotland, which has now entered ...

3 · In Texas, the "wind-solar hybrid" projects have increased renewable penetration by up to 40% without requiring expensive battery storage. Think of them as peanut butter and jelly ??? -- ...

Learn about Poland's EUR1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

One large missing piece has been funding. Storage projects are risky investments: high costs, uncertain returns, and a limited track record. Only smart, large-scale, ...

The 45 battery and thermal energy storage projects allocated European Union subsidies will add more than 779 MW/3.4 GWh of capacity to the Spanish grid.

Standalone and renewables-plus-storage battery projects can apply for up to 85% co-financing, along with pumped hydro and thermal energy storage sites.

The government of Spain is launching EUR160 million (US\$170 million) in grants for energy storage projects, aiming to fund 600MW of projects to go online in 2026.

Source: CATL By 2026, this landmark project will mark a new era in Europe's sluggish EV market. Stellantis and CATL both are confident in delivering cost-effective battery solutions and supporting the continent's ...

Battery energy storage systems (BESS) can help address the challenge of intermittent renewable energy. Large scale deployment of this technology is hampered by perceived financial risks and lack of secured ...

A \$310 million in financing was secured by Enlight Renewable Energy, to expand Spain's Gecama site into a 554 MW hybrid solar, wind, and BESS project by 2026.

Large scale battery storage project financing options in Spain 2026

This one-day forum is tailored for professionals planning or investing in large-scale battery energy storage systems, offering insights into key topics such as grid connection, permitting, technical planning, trading, ...

The Polish BESS market is still taking shape and deployment of the first large scale battery storage facilities is expected in early 2026. Meanwhile, the potential is enormous - the estimated annual revenue from 1 MW is at ...

The loan covers financing for three 2-hour duration battery storage projects in Whitebirk (25MW), Holmston (50MW) and Drum Farm (50MW). In England, Field Whitebirk, located in Blackburn, Lancashire, is ...

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy ...

For stakeholders in battery storage, thermal storage, and pumped hydro, this program offers not only financial backing but also long-term stability and political support.

The term project finance refers to the financing of large infrastructure or energy projects entailing substantially significant initial costs and extremely long depreciation periods. Just in 2015, this business moved over ...

A render of the BESS project in Germany. Image: Kyon Energy. Developer Kyon Energy has claimed the largest approved BESS in Europe for a 275MWh project in ...

Beyond batteries, China is further developing a number of non-battery storage projects including the world's largest flywheel energy storage project (30 MW) which was connected to the grid in 2024.

While financing the storage of electricity has often been carried out on a low-leveraged, corporate or portfolio basis, as the size of battery projects increases, we are now ...

However, financing the development of renewable energy projects remains a significant challenge. With high upfront costs and various risks involved, finding the right funding strategy ...
