A lithium-ion or Li-ion battery is a type of rechargeable battery that uses the reversible intercalation of Li + ions into electronically conducting solids to store energy. In comparison with other commercial rechargeable batteries, Li-ion batteries are characterized by higher specific energy, higher energy density, higher energy efficiency, a longer cycle life, and a longer ...

In our ongoing series about solar energy storage technologies we explored in the previous part 2 the functioning and advantages and disadvantages of lead-acid (PbA) batteries, still the most popular battery technology used with solar off-grid systems.. Now in this part 3, we will have a closer a look at lithium-ion batteries which - though being a relatively new technology - have ...
